Chief, Building Planning Staff

Assistant General Counsel

**Photographs of New Building for
Display to Congressional Committees**

Today I asked Mr. Warner if he would like photographs of the new building in the process of construction so that he might show them to our congressional committees at some appropriate time early in the next session of Congress. Mr. Warner replied that such photos would indeed be very useful. I told him that the normal monthly pictures would probably be taken next some time during the first ten days in January. Mr. Warner said that the distribution to him of pictures taken at that time would serve his purposes. He had no special requests as to the number of pictures or type of coverage nor did he indicate the quantities he might need. I will obtain more details on this in the near future. However, I suggest that the January coverage be made with this use in mind, and that a number of different views from the air and the ground be obtained.
